CURRICULUM VITAE · SOFTWARE ENGINEER · UI/UX DESIGNER

Elias Mjøen

elias@mjoen.ch elias.mjoen.ch linkedin.com/in/mjorn github.com/mjorn-gh Switzerland

PROFILE

I work where design and engineering meet: I analyse how people want to use an application, then design and build a solution around it. I'm currently at Bertschi Digital Logistics AG, where I work as a designer and an engineer and lead the UI Expert Group.

CAREER & EDUCATION

07/2023 – today

UI/UX Designer & Software Engineer

Bertschi Digital Logistics AG

Hybrid role across design and engineering: UX concepts and solution design, full-stack development in the ordering team, and lead of the UI Expert Group.

- Conceived and built a shared data table framework for 10 data-heavy browser applications: analysed how each displays and handles data, designed a common look and behaviour with Claude Design, and implemented the frontend framework (React). Its concepts became the basis for the backend implementation by another team.
- Headed the redesign of the design system and React component library of the transport management system, from Figma to Storybook (React, Vite, Storybook, SASS, Figma).
- Helped shape and build a new document management system with AI-based document categorisation: brought the user-centred perspective into its concept and architecture, designed how the categorisation results are presented to users, and took part in coding and code reviews (Java, React, MongoDB, AWS, OpenAPI).
- Member of the pilot team for AI-assisted development: helped define how we work with coding agents, from early GitHub Copilot IDE Suggestions and ChatGPT prompting to rule- and skill-based workflows in Claude Code.

09/2019 – 03/2023

BSc Computer Science, design & management

FHNW School of Engineering

Specialisation in design & management. Projects for Allianz Suisse, cyber-security research and scheduling optimisation.

- Lead management app for Allianz Suisse (React, Spring Boot)
- Cyber-security info site (React)
- General model for scheduling problems (C# .NET 6, Gurobi)

08/2017 – 12/2018

Software Engineer (C# .NET WPF)

Mammut Soft Computing AG

Intern, then full-time .NET developer building small desktop applications.

08/2014 – 06/2018

EFZ Application Developer & BM (commerce)

Old Cantonal School Aarau & BBBaden

IMS programme covering OOP (Java, C#), HTML/CSS/JS, SQL databases, software engineering and computer systems.

SKILLS & LANGUAGES

Java React AI-assisted development
UI/UX design MongoDB Claude Code
Design systems Claude Design
Component libraries Vite Figma
Storybook SASS OpenAPI Spring Boot
